[GEN 51]	Defect safety risks classification	H - High risk (class 3)
[GEN 52]	Description of health/safety defects	[EN] Basis for the hazard is the extremely high water vapor passage resistance of the suit. This prevents the natural warming of the body by sweating and evaporation on the skin surface. As the body exerts more heat during physical exertion - especially during fire fighting and rescue operations - the limited thermoregulation causes the risk of heat stress and a heat stroke.
